PERSONAL PROJECTS

Talenterorientation.com

A Fully Responsive and multi user Learning Management System. This is based on Ed-Tech Platform and used for Online Education Courses.

PD Hinduja hospital

Created a fully responsive website using PHP, HTML5 and CSS3 which allows users to fill hospital forms in a digitalize way from anywhere in the world. This project aims at promoting Digital India and was selected in Smart India Hackathon 2018.

thetechpy.com

Fully responsive website using wordpress. Where I post self-written technology-related articles twice a week and upload hundred of free courses to enroll.

ERP System

Created a fully responsive website using bootstrap which helps the students to get study-related notes. This Interface helps faculty to convey important messages , notices, internal results ,datasheet, etc. to the students at one platform.

Job portal for Uttrakhand Government

Created a fully responsive website (Job Portal) for the Uttrakhand Government using PHP, HTML5 and CSS3. It has great features which makes it different from famous job portals such as Naukri etc. This project was selected in Smart India Hackathon 2020.

COVID-19 Dashboard

Created a Dashboard showing COVID-19 status using.
